linkedin: akash-vishwakarma | github : akashondev

## Skills

---

**Programming Languages:** Java , Python , JavaScript , C++

**Web Development:** HTML , CSS , ReactJS , ExpressJS , NodeJS

**Databases:** SQL , MongoDB

**Platforms:** VS Code , NetBeans

## Education

---

- **Bachelor of Science in Computer Science** 2022 – 2025  
Mulund College of Commerce (Autonomous)  
CGPA: 7.5/10
- **Higher Secondary Education (XII)** 2020 – 2022  
Gyanodaya College

## Certifications

---

- **Cyber Security** (Microsoft)
- **Robotic Process Automation** (RPA)
- **Advanced Cyber Security** (Microsoft)
- **Tableau Data Visualization**
- **Ruby on Rails**

## Projects

---

- **Movies Ticket Booking Website**
  - Built a full-stack movie ticket booking web app using React.js, Node.js, and Tailwind CSS.
  - Allows users to explore movies, select showtimes, theaters, seats, and make payments.
  - Implemented dynamic seat selection — when a user books a seat, it's instantly blocked for others in real time.
  - Added an admin dashboard to manage movies with create, update, and delete operations.
- **Video Editing Mobile App**
  - Developed a mobile video editing app using Java, Kotlin, and XML in Android Studio.
  - Features include video trimming, grayscale filters, resolution adjustment, text overlay, and cropping.
  - Integrated Supabase for user management and backend storage.
  - Utilized FFmpeg for performance-intensive video frame manipulation and exporting.

## Achievements

---

- **Math Wonder – Runner-Up:** Secured second place for creating a Mobius strip origami model showcasing the creative application of mathematical concepts.

## Summary

---

Computer Science graduate skilled in full-stack development and mobile app creation, with hands-on experience building scalable applications using modern technologies like React.js, Node.js, and Android development. Passionate about creating user-centric solutions with expertise in both frontend and backend development.
